We live in a world dominated by digital media. Music is manipulated digitally until it supposedly sounds “perfect”.

Everything human, corners and edges are polished away.

Dr.Slide is different, real and analogue, doesn't want to be perfect, prefers to be wild and free, shakes you awake, sometimes challenges our contradictions, sweeps you away - be alive!

Edgy, worn by the rough winds of life, still hopelessly romantic, all this, is what his music sounds like.

With his irrepressible energy and a wonderfully offbeat sense of humor - without neglecting the spiritual side of life - he captivates the audience.

He lives for and through his music, plays with all his heart and soul, paints his life stories in his own, genuine colors, with a voice that gets under your skin.

After a few encores, Dr. Slide is sending his audiences off , enchanted, with a feeling of new vitality, strength and bliss into this beautiful world.
